

SafetyClaw Compact

Versatile drop-and-go HVM barrier

The SafetyClaw Compact is a flexible, drop-and-go hostile vehicle mitigation (HVM) barrier, designed to prevent vehicle incursions and provide a deterrent to unauthorised vehicle access.

This versatile solution is ideal for a wide range of applications and requires no guarding, reducing security costs. The narrow width allows for pedestrian permeability.

The SafetyClaw Compact can be customised for branding, advertising or wayfinding.

Testing & Certification

ISO 22343-1:2023
V/7200[N2A]/48/90:11.9/13.5

Technical Specification

Height	1,150mm
Depth	1,840mm
Width	1,150mm
Weight	820kg

Features and Benefits

- Surface-mounted with no fixing or anchoring required
- Low penetration depth of under 12 metres
- No supervision or guarding necessary
- Suitable for installation over kerbs, on curves and against walls
- Robust, fully galvanised, and tamper-resistant units
- Advertising can be integrated via a durable Alu-Dibond panel

ABOUT HIGHWAY CARE. We develop innovative solutions that support the highways and protective security sectors, backed by more than 50 years of experience. As part of Ramudden Global, we combine local expertise with the strength of an international group dedicated to safety and security in road and infrastructure environments.
