Leonidas Crash Cushions

Our SMA Leonidas crash cushion range includes 43 crash cushion and P4 end terminal variants in four sizes, catering for any road layout, speed restrictions or roadside hazards. The range includes crash cushions that have been specifically designed for urban areas and lower speed roads, and includes market-leading short system lengths for sites with limited space.

- D1 & Z1 performance
- The low permanent lateral displacement zone class (D1) combined with short system length means the cushion can be installed where others cannot
- Simple replacement of the impact absorbing panels after a collision
- Supplied assembled to allow for quick & efficient installations
- Various installation options, including asphalt & concrete

Technical Specifications
